

Synergy between CIT - ISET KH and partners

Main activities

The Textile Innovation Center offers services in :

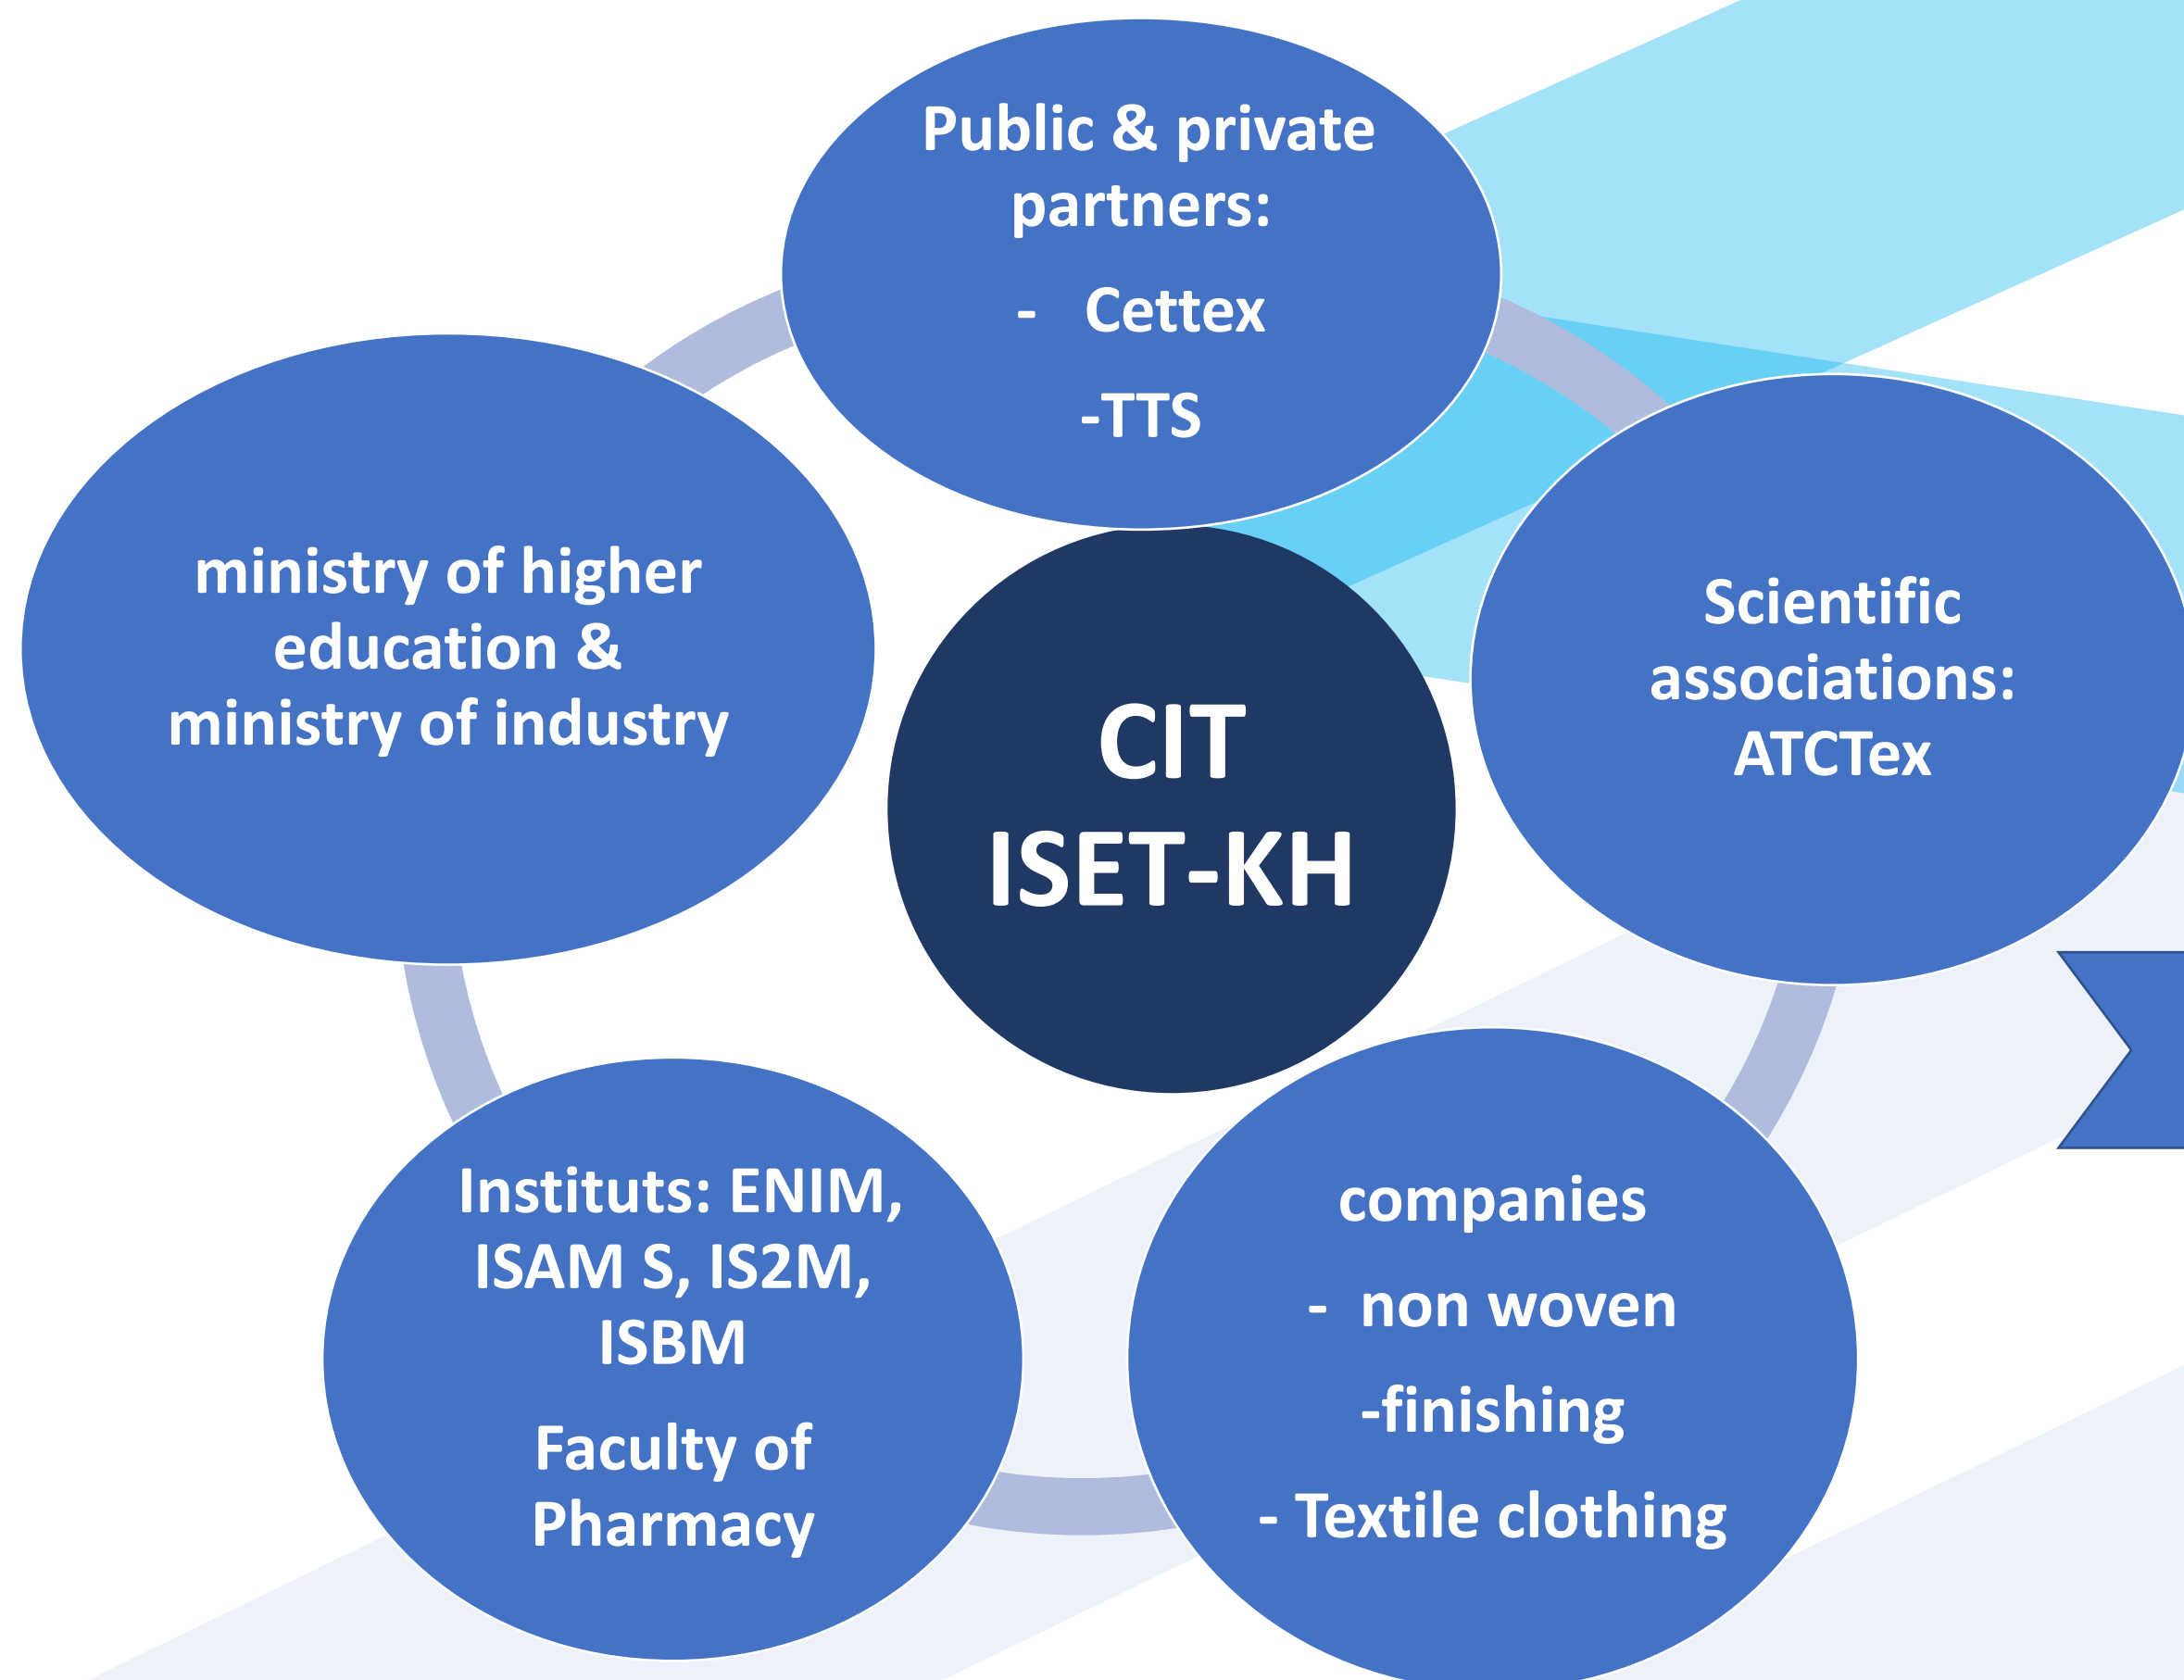

- Diagnosis of innovation areas,
- Assistance in process optimization,
- Development of innovative prototypes and launch follow-up.

CIT: A driver for innovation

- Access scientific expertise by reducing the risks associated with innovation
- Benefit from high value-added results: prototype, patent, process, product, know-how.

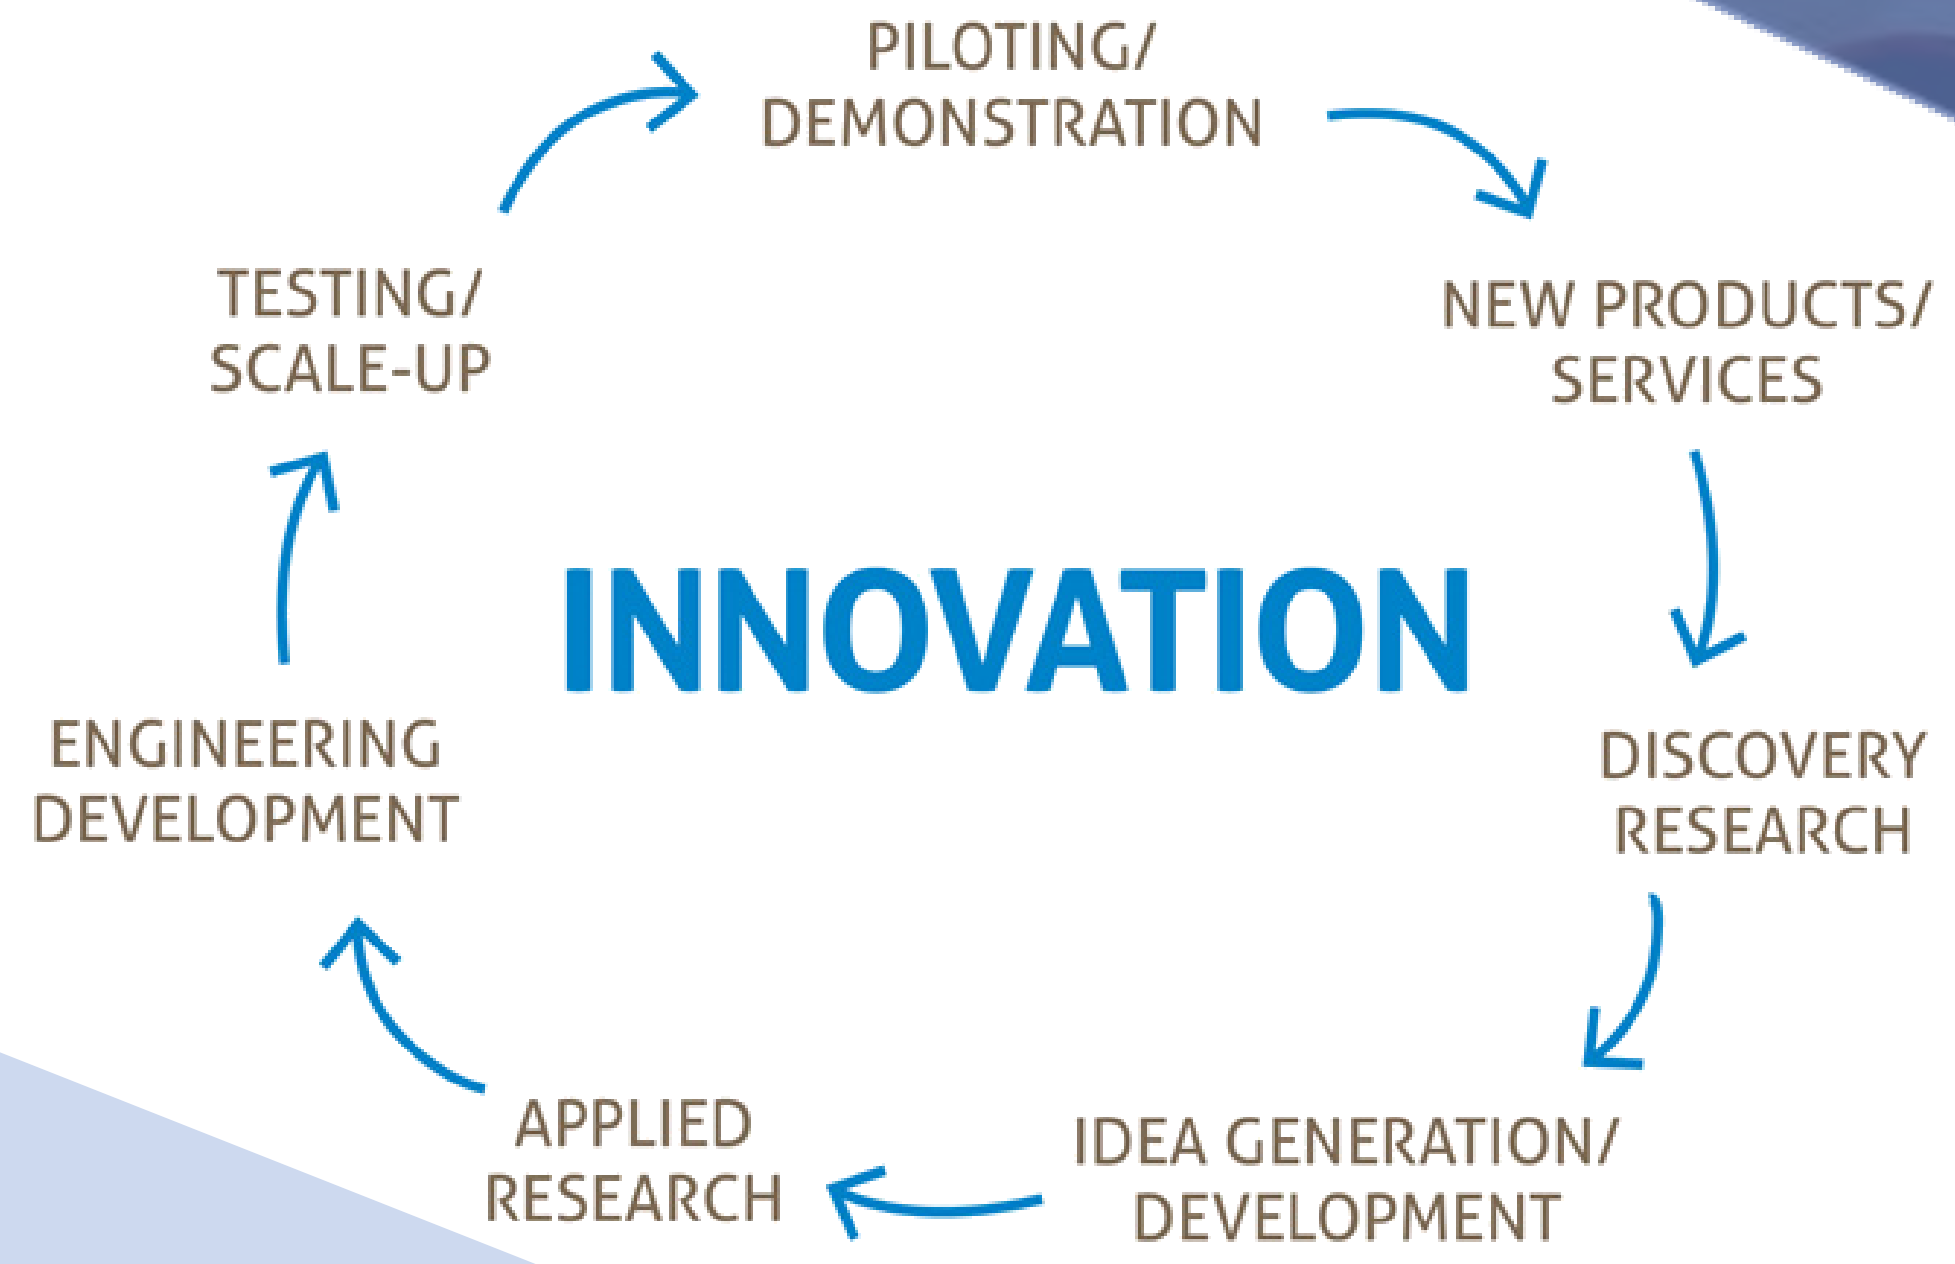

University-industry collaboration, knowledge & technology transfer, and solution development.

Synergy between CIT ISET KH and partners

Let's work together

- Promotion the centre through all partners
- To exploit the expertise and material of the different structures
- To have access to the different resources
- To ensure the financing and sustainability of the centre
- Development of the Tunisian textile sector
- To define the strategic axes relating to the textile sector

Objectives

- To reinforce the interactions between research and the socio-economic world through technology transfer
- To put material and human resources at the disposal of textile industrialists
- To stimulate the employability of young researchers by the integration of innovative and successful companies or by entrepreneurship in the innovation business.
